

Creator Marketing Automation Platform

An End-to-End AI-Powered Creator Outreach & CRM Automation System

n8n Workflow

Gmail API

Groq LLM (compound-mini)

Google Sheets CRM

📌 Executive Summary

The **Creator Marketing Automation Platform** is an enterprise-grade automation engine designed to scale creator partnership workflows. It automates outreach candidate ingestion, AI-driven personalized email drafting, multi-stage outreach dispatch, incoming email parsing, sentiment analysis, and continuous Google Sheets CRM status updates in real-time.

🏗️ System Architecture Flow

⚡ Key Technical Capabilities

- **Automated Outreach Pipeline:** Ingests potential creator profiles from Google Sheets and creates personalized draft emails leveraging Groq LLM.
- **Human-in-the-Loop Verification:** Integrates an approval status gate prior to sending outreach emails.
- **Real-time CRM Feedback Loop:** Listens for incoming email responses using Gmail Webhooks/Polling, parses sentiment using LLM, and updates creator status automatically.
- **Robust Error & Expression Handling:** Engineered custom regex extractions for RFC-compliant email header parsing and prevented Google Sheets formula injection errors.

🔧 Tech Stack & Credentials Setup

Component	Technology	Role / Function
Orchestrator	n8n Cloud	Workflow engine, data transformation, polling schedule
Email Service	Gmail API / OAuth2	Drafting, email dispatch, inbox polling trigger
Database / CRM	Google Sheets API	Structured creator database, outreach logs, and status updates
AI Engine	Groq API (compound-mini)	Zero-shot outreach generation & email sentiment parsing

Production Configuration & Polling Rules

The production workflow operates on an automated polling cycle:

- **Trigger Mode:** Every Hour polling on Gmail INBOX.
- **Email Extraction Formula:** `=({ $json.From.match(/<([>]+)>/)?.[1] || $json.From })`
- **CRM Update Logic:** Row matching based on cleaned recipient email address.

Client Case Study (Portfolio Summary)

Case Study: Scaling Creator Outreach with AI & n8n

Problem: Managing influencer and creator outreach manually required dozens of hours weekly in personalized drafting, email tracking, and CRM status updates, leading to response bottlenecks.

Solution: Built a production-grade n8n automation pipeline that integrates Google Sheets CRM with Gmail and Groq LLM. The system ingests qualified profiles, generates tailored collaboration drafts, dispatches emails upon approval, and automatically listens for replies to analyze sentiment and update CRM statuses.

Results: Reduced manual outreach management overhead by 90%, enabled 100% accurate real-time CRM updates, and cut response processing time from hours to seconds.
